

PLASTIC FUEL TANKS

IMPORTANT NOTICE

It has been brought to our attention that people are fitting plastic fuel tanks to karts that may not be suitable for this use. If a fuel tank breaks down or splits because it is not made from material that will withstand petrol we could have drivers getting seriously burnt. Our recommendation is that you only use purpose made kart fuel tanks supplied by a reputable dealer. If you choose not to do this please check very carefully that what you use is suitable for containing petrol.

Please refer to rule relevant KartSport New Zealand rules for further details.
